Hanoi, Vietnam

EDUCATION

FPT UNIVERSITY (2020-2024)

Major: Software Engineering

Honorable Student of Semester (Spring 2022)

SOFT SKILLS

- Communication
- Teamwork
- Work under high pressure

TECHNICAL SKILLS

- Microservices, CQRS, Clean Architecture, SOLID, Design Patterns
- .NET Framework, .NET Core, Entity Framework Core, LINQ
- SQL Server, PostgreSQL, MongoDB, schema design, indexing,..
- RabbitMQ (async messaging), Redis (caching, rate limiting)
- Docker, IIS, Linux/VPS, CI/CD, AWS, Azure DevOps
- ReactJS, TypeScript, RESTful API design
- Harness & Claude Code

CAREER GOALS

I have more than 2 years' experience as a .NET developer with end-to-end web application exposure. Advancing toward a Solutions Architect path, I adapt quickly to new technologies and thrive in team environments where I can deliver impactful results, contribute to company growth, and learn from experienced peers.

WORK EXPERIENCE

ADD-ON DEVELOPMENT CO., LTD (10/2024 - Now)

Projects: Resource Central, Resource Finder, Clients-App (*)

Role: FullStack Developer

Team size: 12 members

Responsibilities:

1. Developed .NET 8 microservices while modernizing legacy systems (.NET Framework, ASP.NET MVC, jQuery)
2. Designed SQL Server database schemas and integrated RabbitMQ for async messaging and data sync
3. Implemented multi-agent workflows using LangGraph/LangChain to bring AI capabilities into Clients-App (a product of AOD)
4. Built custom ASPX/RDLC reporting modules to support business analytics
5. Partnered with foreign POs/BAs to refine requirements and provided direct live-site technical support for international clients
6. Built and managed Build & Release Pipelines on Azure DevOps, created desktop installer packages via InstallShield

NGONNGON1970S (09/2025 - 12/2025)

Projects: Ngonngon1970s - Koeln, Germany (**)

Role: Full-stack Engineer (Freelance)

Team size: 2 members

Responsibilities:

1. Clarified raw client ideas into functional specs, selected the entire tech stack and designed the system
2. Built backend services with .NET 8 & SQL Server, developed responsive frontends using React (TypeScript/Vite)
3. Configured Azure DevOps CI/CD pipelines to deploy backend containers to a Linux VPS (Nginx reverse proxy) and hosted frontend assets on Cloudflare Pages.
4. Developed scheduled background jobs using IHostedService (PeriodicTimer) for automated daily data cleanup

CERTIFICATIONS

- Project Management Principles and Practices - Coursera (04/2024)
- CertNexus Certified Ethical Emerging Technologist - Coursera (03/2023)
- Software Development Lifecycle - Coursera (10/2022)

LANGUAGES

- English: Upper-Intermediate / B2 (Good command of Technical Speaking, Listening, Reading & Writing)
- Japanese: Beginner Level

FPT SOFTWARE CO., LTD (04/2023 - 08/2023)

Projects: 7-Eleven POS System (***)

Role: Developer

Project size: ~130 (split into smaller per-module sub-teams)

Responsibilities:

1. Analyzed legacy C++ codebase and WinForms interfaces to support modernizing the POS system into a C# Unity UI (MVVM Pattern) & C#/.NET backend architecture.
2. Built RESTful APIs using C#/.NET under strict senior code reviews, adhering to enterprise design patterns and code quality standards.
3. Developed a custom WinForms barcode generation tool used by the dev/QA team to baseline legacy behavior and streamline testing during early-stage implementation.

CLARIFICATIONS

Projects: Resource Central, Resource Finder, Clients-App (*)

1. Resource Central is a meeting and workspace management tool for Microsoft 365, Outlook, and Exchange, enabling users to plan, book, and manage meeting rooms along with related services in a single integrated booking solution. Resource Central can be deployed on-site, on the customer's own cloud, or on Add-On Products' cloud as a SaaS solution.
2. Resource Finder and Clients-App are cross-platform Outlook Add-ins for Resource Central, connecting directly to the Resource Central Backend which handles core booking logic, syncs with Microsoft Exchange, and manages resource and order data enabling users to book meeting rooms, resources, and extra services seamlessly within Outlook without switching applications.

Projects: Ngonngon1970s - Koeln, Germany (**)

1. Ngonngon1970s Client is a customer-facing web application for a restaurant in Cologne, Germany, catering to local residents and tourists. It allows customers to view dynamic menus, place online orders, make table reservations, process PayPal payments, receive automated email notifications, and utilize a membership loyalty program.
2. Ngonngon1970s Admin Panel is a centralized management system that enables administrators to configure operational rules (daily opening hours, dynamic site content, custom promotions), manage staff accounts, process delivery workflows, generate sales reports, and maintain system integrity via automated cleanup routines and system configurations (Mail system, PayPal).

Projects: 7-Eleven POS System (***)

1. 7-Eleven POS System is an enterprise Point of Sale solution designed for 7-Eleven convenience store chains. The platform comprises a customer-facing self-checkout kiosk for independent payment processing (cash/coins insertion, credit cards, QR/barcode, electronic card charging, and automated change dispenser), seamlessly integrated with a centralized POS back-office for real-time inventory tracking, multi-store product catalog management, promotions engine, and secure transaction synchronization with enterprise infrastructure.
